

Kataleifos Interview Question 4

Kataleifos:

My favorite film role was playing the life of the artist Theophilos Hatzimihail, who is another myth in Greece, an outstanding artist. This was perhaps my favorite role, but I confess that I have played very few times in the cinema, that is, I have taken part in about ten films. The reason I took on a movie role was always because something drew me to it, since the theater remains my main occupation. I mean that all the cinema roles I have played were roles that I chose and I believed in. I didn't play just to advance professionally. It was something that I was interested in -- both the roles and the collaborations. That's how I played these roles. That is, I cannot say that cinema is my first love; I love the theater above all.
